The Handy Kitchen Pail!

It can easily be stored under the sink or on your counter and it's big enough to hold all the food scraps generated by most families in one day. Line it with newspaper or paper bags to keep it clean. Empty it as needed into your green organics cart.

The perfect set out...

- Remember to place carts out at the front of your property prior to 6am on your service day. Wheels should be facing your home.
- Make sure your cart lids fully close. Do not overload.
- Leave at least 2 feet of space on either side of each cart and do not place carts under low-hanging tree branches. This will allow the automated truck arm room to operate.

Also, don't forget...

- Avoid tightly wedging or compacting materials inside your carts. This will help ensure that all materials are emptied from your cart and that your cart is not damaged during service.
- Use a bag or box to contain small, lightweight items before placing them in any of your carts. This will help reduce spills during service.

Got extra? Schedule an On-Call Cleanup

Once every 6 months, at no charge, residents of single-family homes can schedule the collection of up to 4 cubic yards of garbage and 3 large items. The large items can include sofas, water heaters and other furniture/appliances. In lieu of one large item, an e-waste item like a TV, computer, printer, fax machine or VCR may be setout. Charges apply for additional items and for appliances containing Freon.

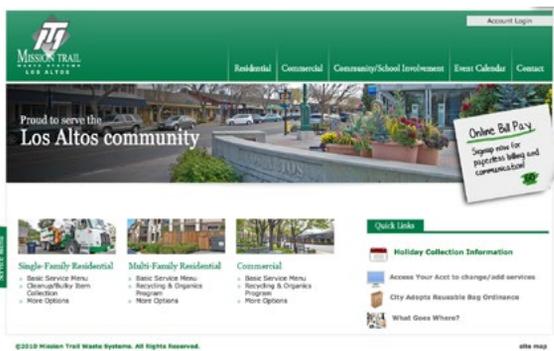

Order Additional Service

Bins of various sizes are available for construction and/or demolition, landscaping and other projects.
